SUSTAINABLE RECREATION.

Mobile Watergen Products Coming Soon

Watergen Mobile Box generates continuous fresh, drinking water while traveling, on or off-grid. Our air-to-water solution provides a safe source of fresh water: no need to worry about contamination, refilling tanks, or using non-environmentally friendly water bottles.

SUPERBASE V

SBV is the world's first plug-and-play home energy system to use semi-solid-state batteries. With more than 228Wh/kg, our batteries have up to 42% more energy than lithium iron phosphate (LiFePO4) batteries. Semi-solid-state batteries are also less likely to pose a safety hazard if damaged, and with our battery management software, the product life span can be an astonishing 10 years or more.

- Recharge to Industry-Leading 6.6kWh Max Input in 1 hour (connected to a Satellite expansion battery + AC + Solar panel)
- Expandable Energy Storage from 6.4KWh to 64KWh for longer-time of use
- The First Home Energy Storage Solution with built-in Dual 120/240 Voltage output
- Portable power station with Industry-Leading 3,000W solar input and 3800-7800W AC output. Integrates with existing solar.

VOICE CONTROL. APP SUPPORTED.

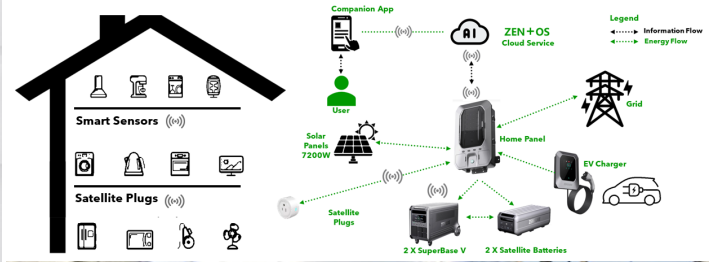

The Zendure app provides up-to-date information about your SuperBase V system. Use the app to customize your system to suit your needs

AND WHEN YOU GET HOME

ALL YOUR POWER NEEDS

LEVEL 2 EV CHARGER

Public charging is inconvenient and expensive, and negates many of the benefits of EV ownership, and someone who buys a Tesla but can't charge at home will figure this out very soon.
