OUTAGE ANXIETY

WHEN A POWER OUTAGE HAPPENS

- HVAC Systems shut down
- Personnel and equipment are idle
- Disruption of operations
- The bottom line takes a hit

WERE YOU AFFECTED BY
THE LAST OUTAGE?
DON'T BE AFFECTED BY
THE NEXT ONE

UNLIMITED POWER

10kW 20kW 250kW 1MW
Scalable to any size system.

Natural Gas lines are underground and protected, not often affected by unexpected occurrences such as storms, accidents, and who knows what.

Scalable systems to provide power for any size operation.

On-Site Power Production using natural gas has unlimited benefits!

POWER SYSTEMS

CRITICAL PART OF MEETING POWER NEEDS OF THE FUTURE

Uses clean Natural Gas or Propane, and Hydrogen where available.

- On-Site 24/7/365 Reliable, Always On Power
- Reduction in vulnerability to terrorism
- Increased Electric System Reliability
- A Primary / Emergency supply of power
- Blends with & controls Renewable Energy Sources including Energy Storage Systems

Carbon Output is well below EPA Standards

SAVINGS

- Lower or Eliminate Electric Bill
- Reduces Demand Charges
- Rebates and Other Incentives

EFFICIENT

- Delivers Clean & Resilient Energy
- Onsite Primary Power
- Quiet Compact Design

RESILIENT

- Eliminate Power Outages
- More Reliable than the Grid

SUSTAINABLE

- Reduced Carbon Emissions
- Renewable Energy Sources

Solar Systems

Rooftop Solar & Ground
Mount Solar up to 500MW
Utility Scale Systems

WHEN THE GRID GOES
DOWN... SOLAR GOES DOWN.

This is to prevent back feeding the Grid and endangering Linemen.
Our MicroGrid Systems keep Solar working.

Solar HVAC

This market disruptive heat pump is the only one of its kind to use ambient light to compress the refrigerant gases without the compressor doing the work. This results in up to 90% savings on heating, 30%-50% savings on AC and maintains operations in extreme temperatures as low as -20°F.

BioEnergy

Waste is Too Expensive to Throw Away
A bioenergy system can be scaled to meet the needs of your facility and can process food waste, and any other biomass to produce electricity that can be used in common areas for reduced utility expenses and less trash pickup expense.

Lighting & Automation

Programs are tailored to each individual application, and we offer no money down options. We can show you how your savings on utility and maintenance costs are greater than the cost of switching to an LED solution.

Residual Income

What if you could lower your energy expenses to 6¢ per kW and ensure uninterrupted power to your tenants while eliminating peak rates? That would make you your own power company! You can even save your tenants on their energy expenses!

MicroGrid Benefits

DRASTICALLY REDUCE YOUR POWER RATES

INCREASED
EFFICIENCY
24/7/365 Power
No Outages

REDUCED EXPENSES
Lowers Energy Costs
by up to 75%

RELIABLE &
CONSISTENT
No Power Spikes
No Peak Rates

CUSTOMIZABLE
Small Applications to
Utility Scale
Renewable Energy

Hydronic Applications

Utilizing the heat from the MCHP Unit, we can repurpose it to heat your pools, hot water, and the general areas of your facility. That means eliminating your heating and hot water expenses.
